All HD and SD to Playlists

v2.0

For iTunes 11+/OS X 10.8+
Find more free AppleScripts
and info on writing your own
at Doug's AppleScripts for iTunes.

Applet creates two playlists containing, respectively, all the HD videos and SD videos in your library.

OS X 10.8 and later only.

This script is Donationware. If you use it and like it please consider making a donation to support my AppleScripting efforts. Click here for more info.

Installation:

This script is a **Cocoa-AppleScript applet** and can be run by double-clicking its icon in the Finder. However, it is probably best accessed from the iTunes Script menu.

Put AppleScripts in your iTunes "Scripts" folder. This is located in your *[user name] / Library / iTunes /* folder.

> *The user Library directory is hidden by default. To make it visible, hold down the Option key on your keyboard and select **Go > Library** from the Finder.*

If there is no folder named "Scripts" in the *[user name] / Library / iTunes /* folder then create one and put the script(s) in it. AppleScripts will then appear in iTunes' Script menu, and can be activated by selecting by name and clicking. Be sure to also save this Read Me document in a safe and convenient place.

See the online Download FAQ **for more info and video on downloading and installing AppleScripts.**

How to use:

Launch the script from your iTunes Script menu, or by double-clicking it in the Finder, and follow the prompts. In a few moments, two new playlists will be created, one containing all of the HD video tracks and the other all the SD video tracks in your library.

Each time the applet is run it will re-create the playlists
