Audition End

v2.3

For iTunes 12.x+/OS X 10.12+
Find more free AppleScripts
and info on writing your own
at Doug's AppleScripts for iTunes.

This script will play through each track in a playlist beginning at a set number of seconds from the end of each track. Additionally, it can be set to pause a number of seconds between each track; when engaged it will start playing the first track--or the first selected track--in the playlist.

For macOS 10.12 and later only.

This script is Donationware. If you use it and like it please consider making a donation to support my AppleScripting efforts. Click here for more info.

Installation:

Put AppleScripts in your iTunes "Scripts" folder. This is located at *[user name] / Library / iTunes / Scripts /* .

> *The user Library directory is hidden by default. To make it visible, hold down the Option key on your keyboard and select* **Go > Library** *from the Finder.*

If the *[user name] / Library /* folder does not contain the "iTunes" or "Scripts" folders then then create them and put the script(s) in the "Scripts" folder. AppleScripts will then appear in iTunes' Script menu, and can be activated by selecting by name and clicking. Be sure to also save this Read Me document in a safe and convenient place.

**See the online** Download FAQ **for more info and video on downloading and**

installing AppleScripts.

How to use:

FOR BEST RESULTS: Clear the **Up Next** queue in iTunes!

• Click the popup window button located between the iTunes LCD panel and the search field, select "Up Next", scroll to the bottom of the list and click "Clear". It should now read "No Upcoming Songs".

Launch the script. Adjust its settings:

Select a playlist or any track in a playlist and click the script's "Engage" button. (This button's title will toggle to "Stop".)

Each track in the playlist will play starting at the entered number of seconds from its end.

To disengage the script before getting to the last track in the playlist, click on the "Stop" button. The currently playing song (if any) will finish playing and iTunes will stop.

To dismiss the script, choose "Quit Audition End" from the script's Application menu or simply press **Command-Q.**
