

Clipboard to Lyrics Scripts

v2.0

For iTunes 11+/OS X 10.6+
Find more free AppleScripts
and info on writing your own
at Doug's AppleScripts for iTunes.

Two scripts, "Clipboard to Current Track's Lyrics" and "Clipboard to Selected Track's Lyrics" will copy text from the clipboard to, respectively, the current track's or selected track's lyrics.

This script is Donationware. If you use it and like it please consider making a donation to support my AppleScripting efforts. [Click here for more info.](#)

Installation:

Put AppleScripts in your iTunes "Scripts" folder. This is located in your *[user name] / Library / iTunes /* folder.

*The user Library directory is hidden by default. To make it visible, hold down the Option key on your keyboard and select **Go > Library** from the Finder.*

If there is no folder named "Scripts" in the *[user name] / Library / iTunes /* folder then create one and put the script(s) in it. AppleScripts will then appear in iTunes' Script menu, and can be activated by selecting by name and clicking. Be sure to also save this Read Me document in a safe and convenient place.

See the online Download FAQ for more info and video on downloading and installing AppleScripts.

How to use:

Select and copy some text to the clipboard. (For example, some text from an email or a web page.)

Select the appropriate script, "Clipboard to Current Track's Lyrics" and "Clipboard to Selected Track's Lyrics", to, respectively, copy the clipboard text to either the lyrics tag of the currently playing iTunes track or a single selected iTunes track.
