

Clipboard to Multi-Tracks Lyrics

v1.0

AppleScript for iTunes

Find more **free** AppleScripts
and info on writing your own
at Doug's AppleScripts for iTunes.

This script will paste the contents of the clipboard to the Lyrics tag of each selected iTunes track. (For instance, you want the same lyrics text for each of your six copies of "Sugar Magnolia".)

This script is Donationware. If you use it and like it *please* consider making a donation to support my AppleScripting efforts. [Click here for more info.](#)

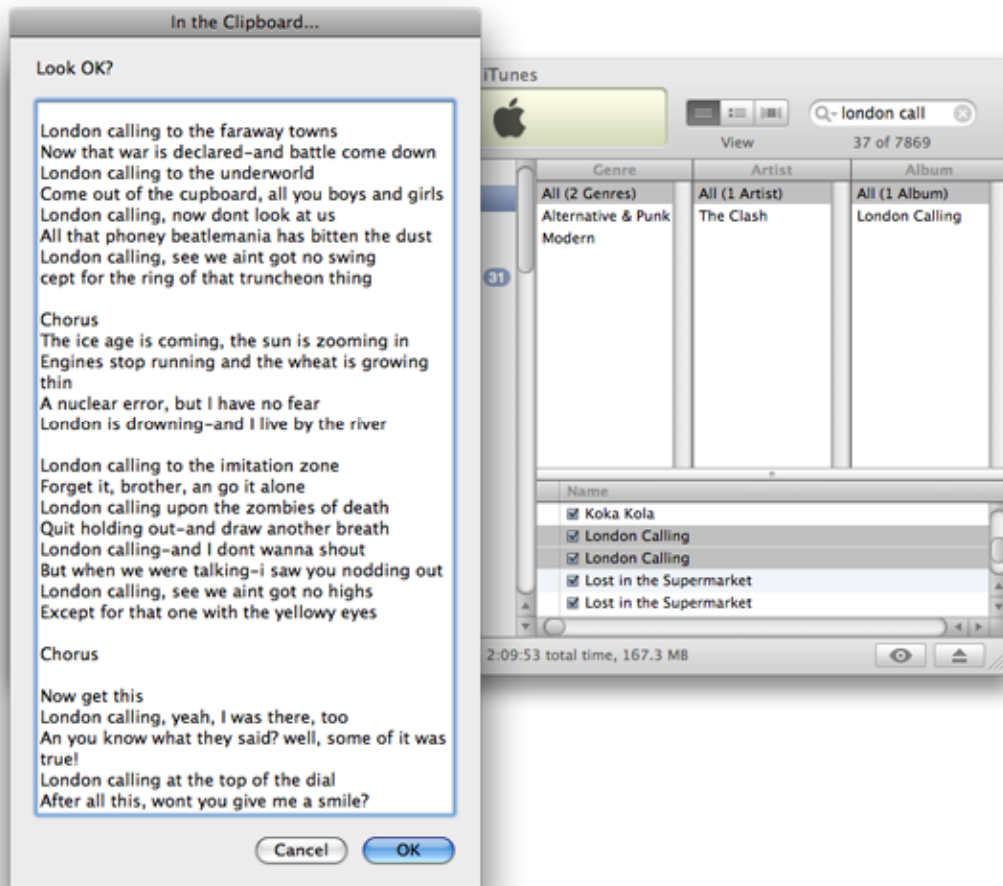

Installation:

To manually install: Put AppleScripts in your iTunes Scripts folder. This is located in *[user name] > Library > iTunes*. If there is no folder named "Scripts" there, create one and put the script(s) in it. AppleScripts will then appear in iTunes' Script menu, and can be activated by selecting by name and clicking. Be sure to also save this Read Me document in a safe and convenient place.

How to use:

Copy some text--that is, press **Command-C** after selecting and highlighting some text somewhere--you want to use as Lyrics. Then, select the tracks in iTunes whose Lyrics tag you want the text copied to. They should probably be songs that actually have the *same* lyrics ;)

Run the script by clicking on its name in iTunes' Script menu. The contents of the clipboard, what you just copied, will be displayed:

Click the "OK" button to apply the text to the Lyrics tag of each track you selected in iTunes. Or, click the "Cancel" button to quit.

Make a mistake? You can't Undo, but you can copy a single blank space and use the script to re-paste the tags.
