

Color File Labels of Tracks

v1.1

AppleScript for iTunes

Find more **free** AppleScripts
and info on writing your own
at Doug's AppleScripts for iTunes.

This script will set the label color of the files of selected tracks to a different color based on the kind of track. Currently:

Regular AAC = red
Protected AAC = orange
AIFF = yellow
Apple Lossless = green
MP3 - blue
WAV = purple
QT movie = gray

This script is Donationware. If you use it and like it *please* consider making a donation to support my AppleScripting efforts. [Click here for more info.](#)

Installation:

To manually install: Put AppleScripts in your iTunes Scripts folder. This is located in *[user name] > Library > iTunes*. If there is no folder named "Scripts" there, create one and put the script(s) in it. AppleScripts will then appear in iTunes' Script menu, and can be activated by selecting by name and clicking. Be sure to also save this Read Me document in a safe and convenient place.

How to use:

Select some tracks or any playlist (except the main library) and run the script. After a few moments, the label colors of the files of the selected tracks will be set according to their kind.
