

Create Archive of Selected

v1.0

AppleScript for iTunes

Find more **free** AppleScripts
and info on writing your own
at Doug's AppleScripts for iTunes.

This script will create a .zip archive of the files of the selected tracks. The .zip file is similar to that created by the Finder's "Create Archive" File command, and can be un-archived with a double-click.

This script is Donationware. If you use it and like it *please* consider making a donation to support my AppleScripting efforts. Click here for more info.

Installation:

To manually install: Put AppleScripts in your iTunes Scripts folder. This is located in *[user name] > Library > iTunes*. If there is no folder named "Scripts" there, create one and put the script(s) in it. AppleScripts will then appear in iTunes' Script menu, and can be activated by selecting by name and clicking. Be sure to also save this Read Me document in a safe and convenient place.

How to use:

Select some tracks whose files you wish to archive and run the script. Enter a name for the .zip archive and select a location where it will be created.

The final .zip file will be displayed in the Finder when the script has finished.

Notes:

Only copies of the original files are used.

Depending on the size of the files you have selected, archiving time can vary.
