

Enter Description Text for Selected

v2.0

For iTunes 11+/OS X 10.6+
Find more free AppleScripts
and info on writing your own
at Doug's AppleScripts for iTunes.

This script will apply the same user-entered text to the "Description" tag of each of the selected tracks.

This script is Donationware. If you use it and like it please consider making a donation to support my AppleScripting efforts. [Click here for more info.](#)

Installation:

Put AppleScripts in your iTunes "Scripts" folder. This is located in your *[user name] / Library / iTunes /* folder.

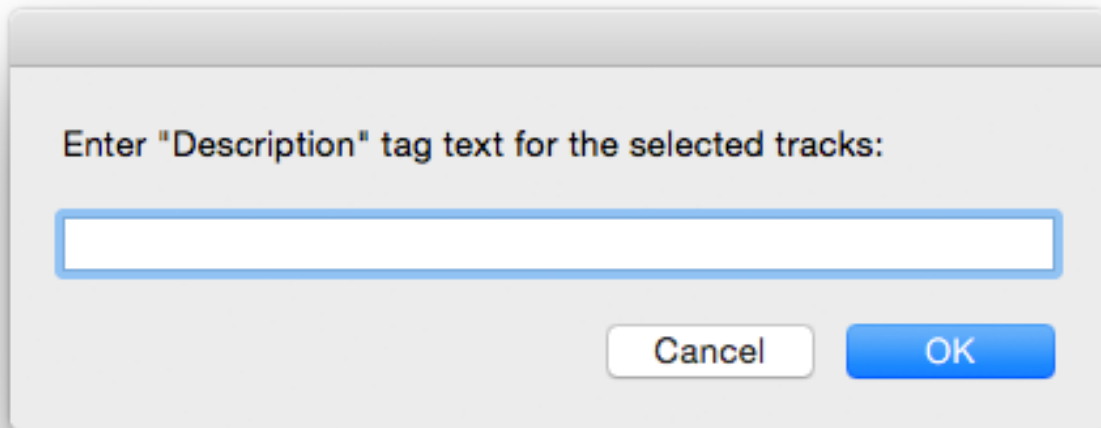

*The user Library directory is hidden by default. To make it visible, hold down the Option key on your keyboard and select **Go > Library** from the Finder.*

If there is no folder named "Scripts" in the *[user name] / Library / iTunes /* folder then create one and put the script(s) in it. AppleScripts will then appear in iTunes' Script menu, and can be activated by selecting by name and clicking. Be sure to also save this Read Me document in a safe and convenient place.

See the online Download FAQ for more info and video on downloading and installing AppleScripts.

How to use:

Select some tracks whose Description tags you wish to edit. Enter some text in the dialog box that appears and press the **OK** button.

If only one track is selected, its Description tag will be displayed as the default text.
