

# Files to Folder Scripts v1.0

AppleScript for iTunes  
written by Derrick Bass

Find more **free** AppleScripts  
and info on writing your own  
at Doug's AppleScripts for iTunes.

This is a collection of two scripts: "**Alias Files to Folder...**" which creates an alias of each file of the selected iTunes tracks in a user-selected location, and "**Copy Files to Folder...**" which will copy the files of the selected iTunes tracks to a user-selected location.

**This script is Donationware. If you use it and like it *please* consider making a donation to support my AppleScripting efforts. [Click here for more info.](#)**

## Installation:

**To manually install:** Put AppleScripts in your iTunes Scripts folder. This is located in *[user name] > Library > iTunes*. If there is no folder named "Scripts" there, create one and put the script(s) in it. AppleScripts will then appear in iTunes' Script menu, and can be activated by selecting by name and clicking. Be sure to also save this Read Me document in a safe and convenient place.

## How to use:

Select some tracks and run either script. You will be asked to select a folder. The script will then perform its task.
