

Albumize v1.2

AppleScript for iTunes

Find more **free** AppleScripts
and info on writing your own
at Doug's AppleScripts for iTunes.

This script re-numbers the "**Track Number _ of _**" tags in every track in the selected playlist to their current Play Order and, optionally, enters a new Album Name for every track.

This script is Donationware. If you use it and like it *please* consider making a donation to support my AppleScripting efforts. Click here for more info.

Installation:

To manually install: Put AppleScripts in your iTunes Scripts folder. This is located in *[user name]* > *Library* > *iTunes*. If there is no folder named "Scripts" there, create one and put the script(s) in it. AppleScripts will then appear in iTunes' Script menu, and can be activated by selecting by name and clicking. Be sure to also save this Read Me document in a safe and convenient place.

How to use:

Turn Shuffle off.

Select a playlist in iTunes' Source list. Arrange the tracks in your preferred play order. Then, control-click on the playlist's name in the Source list for the contextual menu pop-up and select "Copy to Play Order".

Run the script. It will report when it is finished.
