

iTunes Music Store Search Scripts v1.0

AppleScript for iTunes
written by Jason Townsend

Find more **free** AppleScripts
and info on writing your own
at Doug's AppleScripts for iTunes.

These scripts allow you to search the iTunes Store using your choice of track, album, artist, and composer criteria from the currently playing or currently selected track.

This script is Donationware. If you use it and like it *please* consider making a donation to support my AppleScripting efforts. [Click here for more info.](#)

Installation:

If you installed the files from the downloaded disk image by dragging them to the "Installer", then the AppleScript and this Read Me document have already been installed in your *[user name] > Library > iTunes > Scripts* folder. The script will appear in iTunes' Script menu, where you can activate it by clicking on its name.

To manually install, if necessary: Put AppleScripts in your iTunes Scripts folder. This is located in *[user name] > Library > iTunes*. If there is no folder named "Scripts" there, create one and put the script(s) in it. AppleScripts will then appear in iTunes' Script menu, and can be activated by selecting by name and clicking. Be sure to also save this Read Me document in a safe and convenient place.

How to use:

When any song is playing, run the appropriate script by selecting it from iTunes' Scripts Menu.

iTunes Music Store Search searches by song title and artist. The other scripts search by the specified term.

Scripts by Jason Townsend (townsend@mac.com).
