

# Make A Text List v2.0

## AppleScript for iTunes

Find more **free** AppleScripts  
and info on writing your own  
at Doug's AppleScripts for iTunes.

This script will write a discrete alphabetical list of your choice of the Albums, Artists, Album Artists, Composers, Genres, Shows, or Track Names in iTunes to a text file.

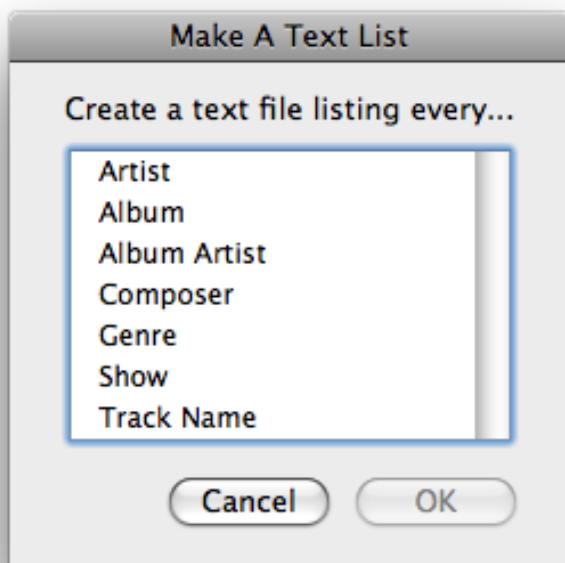

**This script is Donationware. If you use it and like it *please* consider making a donation to support my AppleScripting efforts. Click here for more info.**

### Installation:

**To manually install:** Put AppleScripts in your iTunes Scripts folder. This is located in *[user name]* > *Library* > *iTunes*. If there is no folder named "Scripts" there, create one and put the script(s) in it. AppleScripts will then appear in iTunes' Script menu, and can be activated by selecting by name and clicking. Be sure to also save this Read Me document in a safe and convenient place.

### How to use:

Run the script and select the tag you want to list:

The next Open Save dialog will ask you for a location to save the resulting text file which will

alphabetically list every selected tag.

Optionally, when the script has finished, you can have it opened with TextEdit.
