

Move Playlists to Folder v2.1

AppleScript for iTunes

Find more **free** AppleScripts
and info on writing your own
at Doug's AppleScripts for iTunes.

This script will move the playlists you choose to a new or existing Folder.

This script is Donationware. If you use it and like it *please* consider making a donation to support my AppleScripting efforts. Click here for more info.

Installation:

To manually install: Put AppleScripts in your iTunes Scripts folder. This is located in *[user name] > Library > iTunes*. If there is no folder named "Scripts" there, create one and put the script(s) in it. AppleScripts will then appear in iTunes' Script menu, and can be activated by selecting by name and clicking. Be sure to also save this Read Me document in a safe and convenient place.

How to use:

Run the script.

It will present a choose box listing all your Smart Playlists and regular Playlists. Select the playlists you want to move to a Folder. (If no Folders are detected then you will have an opportunity to create one or more.)

Next, a choose box will list all existing Folder. Additionally, a ">> Make new Folder" option will enable you to create a new Folder.

Select a Folder and the playlists you selected will be moved to it.
