

# New Play Count v2.0

## AppleScript for iTunes

Find more **free** AppleScripts  
and info on writing your own  
at Doug's AppleScripts  
<http://dougscripts.com/itunes/>

Set the Play Count of the selected tracks to a user-inputted number (they will all be set to the same number). If this number is 0 then the Last Played date will be erased (iTunes 8.1 or better).

**This script is Donationware. If you use it and like it *please* consider making a donation to support my AppleScripting efforts. [Click here for more info.](#)**

### Installation:

If you installed the files from the downloaded disk image by dragging them to the "Installer", then the AppleScript and this Read Me document have already been installed in your *[user name] > Library > iTunes > Scripts* folder. The script will appear in iTunes' Script menu, where you can activate it by clicking on its name.

**To manually install, if necessary:** Put AppleScripts in your iTunes Scripts folder. This is located in *[user name] > Library > iTunes*. If there is no folder named "Scripts" there, create one and put the script(s) in it. AppleScripts will then appear in iTunes' Script menu, and can be activated by selecting by name and clicking. Be sure to also save this Read Me document in a safe and convenient place.

### How to use:

Put this script in your iTunes Scripts folder. This is located in *user name > Library > iTunes*. If there is no folder named "Scripts" there, create one and put the script in it. It will then appear in iTunes' Script menu, where you can activate it by clicking on its name.

Select some tracks and run the script. The script will ask you for a number to use as the tracks' new play count. Each selected track will have the same number as a Play Count.

v2.0 mar 12 09  
-- erases played count when play count is '0' - iTunes 8.1 or better

v1.1 aug 24 06  
-- works with streams (URL tracks)

v1.0 oct 16 03  
-- initial release

this doc last updated March 12 09

**If you have any trouble with this script, please email me.**
