

Open iTunes Media Folder

v2.0

AppleScript for iTunes

Find more **free** AppleScripts and info on writing your own at Doug's AppleScripts for iTunes.

This script simply opens your designated iTunes Media folder in the Finder, the one pointed to in iTunes' Preferences > Advanced tab.

This script is Donationware. If you use it and like it please consider making a donation to support my AppleScripting efforts. [Click here for more info.](#)

Installation:

To manually install: Put AppleScripts in your iTunes "Scripts" folder. This is located in your *[user name] / Library / iTunes /* folder.

*The user Library directory is hidden by default. To make it visible, hold down the Option key on your keyboard and select **Go > Library** from the Finder.*

If there is no folder named "Scripts" in the *[user name] / Library / iTunes /* folder then create one and put the script(s) in it. AppleScripts will then appear in iTunes' Script menu, and can be activated by selecting by name and clicking. Be sure to also save this Read Me document in a safe and convenient place.

This script is actually an AppleScript application, or **applet**, that can be placed anywhere on your computer, but is probably best accessed from the iTunes Script menu.

How to use:

Launch the script. Your "designated" iTunes Media folder will be opened in the Finder.
