Playlist to papercdcase.com

v2.0

AppleScript for iTunes

Find more **free** AppleScripts
and info on writing your own
at Doug's AppleScripts for iTunes.

This script will send the Artist, Album name, and various choosable track tags of the selected Playlist to the website papercdcase.com using **Safari**.

papercdcase.com is a website that creates a PDF file of a track listing which can be downloaded, printed, and folded to create a paper CD envelope.

This script is Donationware. If you use it and like it *please* consider making a donation to support my AppleScripting efforts. Click here for more info.

Installation:

To manually install: Put AppleScripts in your iTunes Scripts folder. This is located in *[user name] > Library > iTunes*. If there is no folder named "Scripts" there, create one and put the script(s) in it. AppleScripts will then appear in iTunes' Script menu, and can be activated by selecting by name and clicking. Be sure to also save this Read Me document in a safe and convenient place.

How to use:

Select a Playlist containing **no more than 28 tracks** and run the script.

• You can select to include the **Song Name**, **Artist**, **Composer**, **Time**, **Rating**, and/or **BPM** of the tracks in the selected Playlist in the string supplied to each track box of the papercdcase.com web form. (They already provide the track number.)

For example, this screen shot of the web form illustrates how I have selected to use the Song Name, Time, and Rating:
