

# Put This Where I Want

## It v1.2

### AppleScript for iTunes

Find more **free** AppleScripts  
and info on writing your own  
at Doug's AppleScripts  
<http://dougscripts.com/itunes/>

Copies the file(s) of the selected track(s) to a user-selected location. (Yes, you can drag-and-drop files from iTunes, but one doesn't always have the target folder open, does one?)

**This script is Donationware. If you use it and like it, please consider making a donation to support my AppleScripting efforts. Click here for more info.**

#### How to use:

Put this script in your iTunes Scripts folder. This is located in *home > Library > iTunes*. If there is no Scripts folder there, create one and put the script in it. It will then appear in iTunes' Scripts Menu, where you can select it by clicking on its name.

Select the iTunes tracks whose files you want copied to a specific place and run the script. It will ask you for to locate a folder to which it will copy the files.

**If you have any trouble with this script, please email me.**
