

# Roman Numerals to Upper Case

## v1.0

### AppleScript for iTunes

Find more **free** AppleScripts and info on writing your own at Doug's AppleScripts for iTunes.

This script will convert any Roman numerals in the **name** of each selected track to all upper case.

**This script is Donationware. If you use it and like it *please* consider making a donation to support my AppleScripting efforts. Click here for more info.**

#### Installation:

**To manually install:** Put AppleScripts in your iTunes Scripts folder. This is located in *[user name]* > *Library* > *iTunes*.

*As of OS X 10.7 (Lion), the user Library directory is hidden by default. Option-click the Finder's "Go" menu and select "Library" to make it visible.*

If there is no folder named "Scripts" there, create one and put the script(s) in it. AppleScripts will then appear in iTunes' Script menu, and can be activated by selecting by name and clicking. Be sure to also save this Read Me document in a safe and convenient place.

#### How to use:

Select some tracks in iTunes and launch the script. Any Roman numerals in the **name** of each track will be converted to upper case.

**Note** that this will affect the stand-alone letters "C" and "D" (when used to designate key, for example) and the English pronoun "I". Of course, these are conventionally upper-cased anyway.
