

# Selected Playlists to iPod v2.2

## AppleScript for iTunes

Find more **free** AppleScripts and info on writing your own at Doug's AppleScripts for iTunes.

This script will copy the selected playlists, and the tracks contained in each, from your iTunes library to a mounted iPod.

**This script is Donationware. If you use it and like it *please* consider making a donation to support my AppleScripting efforts. [Click here for more info.](#)**

### Installation:

**To manually install:** Put AppleScripts in your iTunes Scripts folder. This is located in *[user name] > Library > iTunes*. If there is no folder named "Scripts" there, create one and put the script(s) in it. AppleScripts will then appear in iTunes' Script menu, and can be activated by selecting by name and clicking. Be sure to also save this Read Me document in a safe and convenient place.

### How to use:

**Note:** This script only recognizes iPods that are set to "Manually manage music and videos". **iPods set to sync are ignored.** (This setting can be found on the iPod's Summary Screen.)

Run the script. If more than one iPod is available, select only one:

Then, a list box will display all of your iTunes playlists. Select the playlists you want to copy to the iPod and then click on the OK button. Copying will commence. Each of the playlists you selected will be copied to the iPod.
