

Whack Current Track v1.5

AppleScript for iTunes

Find more **free** AppleScripts
and info on writing your own
at Doug's AppleScripts
<http://www.dougscripts.com/itunes/>

This script removes all copies of the **currently playing track** completely from iTunes and moves its file to the Trash. *Use carefully!*

This script is Donationware. If you use it and like it *please* consider making a donation to support my AppleScripting efforts. [Click here for more info.](#)

How to use:

Put this script in your iTunes Scripts folder. This is located in *user name > Library > iTunes*. If there is no folder named "Scripts" there, create one and put the script in it. It will then appear in iTunes' Script menu, where you can activate it by clicking on its name.

While a track is playing, run this script. If it can, it will remove all copies of the track from iTunes (that is, the main library and any playlists it may reside in) and move its file to the Trash.

v1.5 nov 13, 2006
-- generally updated for modern iTunes

v1.1 may 23, '04
-- works with URL tracks (streams)

v1.0 ???
-- initial release (This was released probably as early as 2001, first as a SoundJam AppleScript, and then later modified for iTunes.)

this doc last updated November 13 06

If you have any trouble with this script, please email me.

My name is Doug Adams
