Add or Subtract Play Count

v2.0

AppleScript for iTunes

Find more **free** AppleScripts
and info on writing your own
at Doug's AppleScripts for iTunes.

Add or subtract a user-entered number from the current Play Count of each of the selected tracks.

This script is Donationware. If you use it and like it *please* consider making a donation to support my AppleScripting efforts. Click here for more info.

Installation:

If you installed the files from the downloaded disk image by dragging them to the "Installer", then the AppleScript and this Read Me document have already been installed in your *[user name] > Library > iTunes > Scripts* folder. The script will appear in iTunes' Script menu, where you can activate it by clicking on its name.

To manually install, if necessary: Put AppleScripts in your iTunes Scripts folder. This is located in *[user name] > Library > iTunes*. If there is no folder named "Scripts" there, create one and put the script(s) in it. AppleScripts will then appear in iTunes' Script menu, and can be activated by selecting by name and clicking. Be sure to also save this Read Me document in a safe and convenient place.

How to use:

Select some tracks and run the script. Enter a number which will be added or subtracted from each track's current play count.

• A Play Count set to 0 will also erase the Last Played date (iTunes 8.1 or better)

• If subtracting and the number you enter is larger than a track's current Play Count then that track's Play Count will be set to 0 and its Last Played date erased.
