

Albumize Selection

v3.2

Find more free AppleScripts and info on writing your own at Doug's AppleScripts for iTunes.

This script re-numbers the "Track Number _ of _" info entries in each selected track to its current order and, optionally, enters a new Album Name for every track.

This script is Donationware. If you use it and like it please consider making a donation to support my AppleScripting efforts. [Click here for more info.](#)

Installation:

Put AppleScripts in your iTunes "Scripts" folder. This is located at *[user name] / Library / iTunes / Scripts /*.

*The user Library directory is hidden by default. To make it visible, hold down the Option key on your keyboard and select **Go > Library** from the Finder.*

If the *[user name] / Library /* folder does not contain the "iTunes" or "Scripts" folders then then create them and put the script(s) in the "Scripts" folder. AppleScripts will then appear in iTunes' Script menu, and can be activated by selecting by name and clicking. Be sure to also save this Read Me document in a safe and convenient place.

See the online Download FAQ for more info and video on downloading and installing AppleScripts.

How to use:

For best results, select some tracks in a playlist (and not the *Music* library playlist).

Make sure the playlist is sorted by **Play Order** and that the tracks are arranged in the “correct” order.

- *Create a temporary playlist if necessary. It can always be deleted afterwards.*
- *You can set the current sorted order of tracks in a playlist as the Play Order by Right-clicking on the playlist name and choosing "Copy to Play Order" from the contextual menu that appears.*

Select some tracks and run the script. If you wish, enter an Album name to be applied to each selected track’s album tag.

The script will apply a **track number** to each track according to its play order position and use the number of tracks selected for each track’s **track count**. If chosen, the text entered will be applied to each track’s Album tag.

It will report when it is finished.
