

Append Artist to Filename

v1.0

AppleScript for iTunes

Find more **free** AppleScripts
and info on writing your own
at Doug's AppleScripts for iTunes.

This script renames the files of the selected tracks, appending the Artist name to the beginning of the filename, i.e: "The Ramones - Do You Wanna Dance.mp3".

This script is Donationware. If you use it and like it *please* consider making a donation to support my AppleScripting efforts. Click here for more info.

Installation:

To manually install: Put AppleScripts in your iTunes Scripts folder. This is located in *[user name] > Library > iTunes*. If there is no folder named "Scripts" there, create one and put the script(s) in it. AppleScripts will then appear in iTunes' Script menu, and can be activated by selecting by name and clicking. Be sure to also save this Read Me document in a safe and convenient place.

How to use:

Select some tracks whose filenames you wish to modify. Run the script. Each track's Artist will be appended to the beginning of its filename.

- If the filename has already been appended with the Artist name, or the Artist name is blank, that track will be skipped.
