

Artist to Composer v1.0

AppleScript for iTunes

written by Ben Gertzfield

Find more **free** AppleScripts
and info on writing your own
at Doug's AppleScripts for iTunes.

This script copies the selected tracks' old Artist tag to the new Composer tag, and sets the Artist tag to a new single artist of your choice (descended from AppleScripts by Apple).

This script is Donationware. If you use it and like it *please* consider making a donation to support my AppleScripting efforts. Click here for more info.

Installation:

To manually install: Put AppleScripts in your iTunes Scripts folder. This is located in *[user name] > Library > iTunes*. If there is no folder named "Scripts" there, create one and put the script(s) in it. AppleScripts will then appear in iTunes' Script menu, and can be activated by selecting by name and clicking. Be sure to also save this Read Me document in a safe and convenient place.

How to use:

iTunes 3.0 and later supports a 'Composer' ID3v2 MP3 tag in addition to the 'Artist' tag. This allows for classical or techno compilations where one artist (or group) performs songs by many composers. This script copies the selected tracks' Artist tag to the Composer tag, and sets the Artist tag to a single artist of your choice.
