

# Artwork Scripts v1.0

## AppleScript for iTunes

Find more **free** AppleScripts  
and info on writing your own  
at Doug's AppleScripts for iTunes.

Two scripts: the first, **Add Found to Each Album in Playlist**, goes through an entire playlist and assigns the same artwork to each track of each Album (each Album gets its own artwork); the second, **Selected to Album in Playlist**, assigns the selected track's artwork to its fellow Album tracks in the current playlist.

**This script is Donationware. If you use it and like it *please* consider making a donation to support my AppleScripting efforts. [Click here for more info.](#)**

### Installation:

If you installed the files from the downloaded disk image by dragging them to the "Installer", then the AppleScript and this Read Me document have already been installed in your *[user name] > Library > iTunes > Scripts* folder. The script will appear in iTunes' Script menu, where you can activate it by clicking on its name.

**To manually install, if necessary:** Put AppleScripts in your iTunes Scripts folder. This is located in *[user name] > Library > iTunes*. If there is no folder named "Scripts" there, create one and put the script(s) in it. AppleScripts will then appear in iTunes' Script menu, and can be activated by selecting by name and clicking. Be sure to also save this Read Me document in a safe and convenient place.

### How to use:

These scripts were originally written to take advantage of the--then--new artwork track property. Essentially, they are experiments and merely illustrate how to use the artwork tag. Feel free to use them in your own scripts.
