Assign Half-Star Rating v1.0

AppleScript for iTunes
written by Greg Townsend
Find more **free** AppleScripts
and info on writing your own
at Doug's AppleScripts for iTunes.

This script allows you to take advantage of a little-known feature of iTunes. Using AppleScript, you can assign half-star ratings to tracks in iTunes, beginning with iTunes version 6.0.2.

This script is Donationware. If you use it and like it *please* consider making a donation to support my AppleScripting efforts. Click here for more info.

Installation:

To manually install: Put AppleScripts in your iTunes Scripts folder. This is located in *[user name] > Library > iTunes*. If there is no folder named "Scripts" there, create one and put the script(s) in it. AppleScripts will then appear in iTunes' Script menu, and can be activated by selecting by name and clicking. Be sure to also save this Read Me document in a safe and convenient place.

How to use:

Select one or more tracks to which you would like to assign a rating. Double-click the "Assign Half-Star Rating" icon in the Finder or select "Assign Half-Star Rating" from the iTunes Scripts menu (the one with the AppleScript icon). You will be asked to choose a rating from a list of ratings (0.5, 1.5, 2.5, 3.5, and 4.5).

From the Author:

I made this for fun, and you're getting it for free. That means that in the unlikely event that your computer crashes and burns while you're using it, you can't get anything out of me other than a heartfelt apology and an earnest effort to help you figure out what went wrong. You are free to give this away, but you cannot sell it; please include this Read Me with the package if you do distribute it to others.

Please feel free to send reports of bugs or feature requests to me at greg2@adelphia.net. As I mostly hear about the problems, I'm not sure how well this is working for most people, so I'd appreciate a brief note if it works well for you.
