

Backup Selection or Playlist to MP3 CD v1.0

AppleScript for iTunes

Find more **free** AppleScripts and info on writing your own at Doug's AppleScripts for iTunes.

This script will prepare playlists to be burned as MP3 CD(s) based on user selection of a batch of tracks or on user selection of a playlist.

This script is Donationware. If you use it and like it *please* consider making a donation to support my AppleScripting efforts. Click here for more info.

Installation:

To manually install: Put AppleScripts in your iTunes Scripts folder. This is located in *[user name] > Library > iTunes*. If there is no folder named "Scripts" there, create one and put the script(s) in it. AppleScripts will then appear in iTunes' Script menu, and can be activated by selecting by name and clicking. Be sure to also save this Read Me document in a safe and convenient place.

How to use:

The script will, on being activated, either gather the user's selection of a batch of tracks or it will get every track in a selected playlist and sort the tracks, by album, in a playlist or series of playlists to be burned as MP3 CD(s).
