

Comments To Comments v1.0

AppleScript for iTunes

Find more **free** AppleScripts
and info on writing your own
at Doug's AppleScripts for iTunes.

Copies the Comments field data from each track in a Playlist (or just selected tracks) to its corresponding file's Finder "get info" Comments box.

You can choose to preserve the current "get info" Comments or over-write them.

Other variables are modifiable from within the script.

My thanks go to Morten Stjernholm for his invaluable assistance with this script.

This script is Donationware. If you use it and like it *please* consider making a donation to support my AppleScripting efforts. [Click here for more info.](#)

Installation:

To manually install: Put AppleScripts in your iTunes Scripts folder. This is located in *[user name] > Library > iTunes*. If there is no folder named "Scripts" there, create one and put the script(s) in it. AppleScripts will then appear in iTunes' Script menu, and can be activated by selecting by name and clicking. Be sure to also save this Read Me document in a safe and convenient place.

How to use:

Select some tracks and run the script. Text from each selected track's Comments tag will be copied to its file's "Get Info" comments (Spotlight Comments).
