

# Dan's Remote Scripts v1.0

AppleScript for iTunes

written by Dan Semaya

Find more **free** AppleScripts  
and info on writing your own  
at Doug's AppleScripts for iTunes.

These AppleScripts will allow you to control iTunes on a remote computer. Be sure to open them in Script Editor and provide your remote computer's IP address, then save as "Compiled".

**This script is Donationware. If you use it and like it *please* consider making a donation to support my AppleScripting efforts. Click here for more info.**

## Installation:

**To manually install:** Put AppleScripts in your iTunes Scripts folder. This is located in *[user name]* > Library > iTunes. If there is no folder named "Scripts" there, create one and put the script(s) in it. AppleScripts will then appear in iTunes' Script menu, and can be activated by selecting by name and clicking. Be sure to also save this Read Me document in a safe and convenient place.
