# Delete All Lyrics

v1.2
AppleScript for iTunes
Find more **free** AppleScripts
and info on writing your own
at Doug's AppleScripts for iTunes.

This script will delete the lyrics of **EVERY** track of your Music playlist. This procedure cannot be un-done.

To delete lyrics from a **selection** of tracks use Delete Lyrics.

**OS X 10.6 or 10.7 only.**

**This script is Donationware. If you use it and like it please consider making a donation to support my AppleScripting efforts. Click here for more info.**

## Installation:

**To manually install:** Put AppleScripts in your iTunes "Scripts" folder. This is located in your *[user name] / Library / iTunes /* folder.

*The user Library directory is hidden by default. To make it visible,* hold down the Option key on your keyboard and select **Go > Library** *from the Finder.*

If there is no folder named "Scripts" in the *[user name] / Library / iTunes /* folder then create one and put the script(s) in it. AppleScripts will then appear in iTunes' Script menu, and can be activated by selecting by name and clicking. Be sure to also save this Read Me document in a safe and convenient place.

**Note:** This script is a **Cocoa-AppleScript Applet** and can be run by double-clicking its icon in the Finder. However, it is probably best accessed from the iTunes Script menu.

## How to use:

Launch the script and follow the prompts. Every track in your Music playlist will have its lyrics removed. When the procedure is finished the script will report how many tracks had lyrics reemoved.

Please note that this operation is permanent!
