

# Delete "Continuous" Tracks

v1.0

## AppleScript for iTunes

Find more **free** AppleScripts  
and info on writing your own  
at Doug's AppleScripts for iTunes.

This script deletes scattered "MPEG Audio Stream" tracks in iTunes' "Library" (perhaps downloaded via an M3U playlist). Their time is displayed as "Continuous".

**This script is Donationware. If you use it and like it *please* consider making a donation to support my AppleScripting efforts. Click here for more info.**

### Installation:

**To manually install:** Put AppleScripts in your iTunes Scripts folder. This is located in *[user name]* > Library > iTunes. If there is no folder named "Scripts" there, create one and put the script(s) in it. AppleScripts will then appear in iTunes' Script menu, and can be activated by selecting by name and clicking. Be sure to also save this Read Me document in a safe and convenient place.

### How to use:

Run the script. It will delete all tracks whose iTunes **Kind** is "MPEG Audio Stream".

While the script is running, iTunes will be "locked-up". Just wait for the script to finish. Depending on the number of tracks, this can take a while. You may want to go out and clean the garage or vacuum the car while the script operates.
