

# Disable Dated Tracks v1.0

## AppleScript for iTunes

Find more **free** AppleScripts  
and info on writing your own  
at Doug's AppleScripts for iTunes.

This script will disable (un-check) the tracks of selected iTunes playlists whose last played date is before a user-entered date.

**This script is Donationware. If you use it and like it *please* consider making a donation to support my AppleScripting efforts. Click here for more info.**

### Installation:

**To manually install:** Put AppleScripts in your iTunes Scripts folder. This is located in *[user name] > Library > iTunes*. If there is no folder named "Scripts" there, create one and put the script(s) in it. AppleScripts will then appear in iTunes' Script menu, and can be activated by selecting by name and clicking. Be sure to also save this Read Me document in a safe and convenient place.

### How to use:

Run the script. Choose one or more playlists from the dialog and click the OK button.

Next, a dialog will ask you to enter a date. The date can be entered in one of many acceptable date formats: May 18, 2006, 18 May 2006, 5 18 2006, 5/18/2006, 5.18.06, etc.

Any track in the selected playlists whose last played date is **before** the date you entered will have its check mark box unchecked.
