# Downloads to iTunes v1.0

## AppleScript for iTunes
## written by Pat Gilmour

Find more **free** AppleScripts
and info on writing your own
at Doug's AppleScripts for iTunes.

## This script copies recently downloaded music from your music downloads folder to your iTunes music folder.

**This script is Donationware. If you use it and like it *please* consider making a donation to support my AppleScripting efforts. Click here for more info.**

### Installation:

If you installed the files from the downloaded disk image by dragging them to the "Installer", then the AppleScript and this Read Me document have already been installed in your *[user name] > Library > iTunes > Scripts* folder. The script will appear in iTunes' Script menu, where you can activate it by clicking on its name.

**To manually install, if necessary:** Put AppleScripts in your iTunes Scripts folder. This is located in *[user name] > Library > iTunes*. If there is no folder named "Scripts" there, create one and put the script(s) in it. AppleScripts will then appear in iTunes' Script menu, and can be activated by selecting by name and clicking. Be sure to also save this Read Me document in a safe and convenient place.

### How to use:

It's very simple to set up: just open the 'Downloads to iTunes' script in the AppleScript Editor (found in the AppleScript folder of your Applications folder), and complete Steps 1 & 2 as indicated in the header and body of the script. These step identify where 1) your downloads folder is and 2) where yout iTunes music is.

If you like, change Step 3 too, so that the script gets more or less recently downloaded files. The default is to move music downloaded in the last 12 hours.

That's it. Hope it saves you some time and makes your mp3's more manageable.

This script was developed on OS X 10.1.1 with iTunes 2.0.3
It may not work on other configurations, then again...
