

# Embed Artwork v2.0

AppleScript for iTunes  
written by Brian Webster

Find more **free** AppleScripts  
and info on writing your own  
at Doug's AppleScripts for iTunes.

This script will embed the artwork of the selected tracks into each track's file. iTunes 7 or better

**This script is Donationware. If you use it and like it *please* consider making a donation to support my AppleScripting efforts. Click here for more info.**

## Installation:

**To manually install:** Put AppleScripts in your iTunes Scripts folder. This is located in *[user name] > Library > iTunes*. If there is no folder named "Scripts" there, create one and put the script(s) in it. AppleScripts will then appear in iTunes' Script menu, and can be activated by selecting by name and clicking. Be sure to also save this Read Me document in a safe and convenient place.

## How to use:

Select some tracks. If downloaded artwork is available, it will be embedded in each track's file.

iTunes 7 by default stores downloaded album artwork in a separate "Album Artwork" folder in ~/Music/iTunes. This script will re-apply the artwork data to the selected track's files.
