Enter Long Description Text for Selected v2.0

AppleScript for iTunes
Find more **free** AppleScripts
and info on writing your own
at Doug's AppleScripts for iTunes.

This script will apply user-entered text to the "Long Description" tag of each of the selected tracks. This tag is not directly accessible in iTunes, but is used by podcast preparers or for display in iPad.

This script is Donationware. If you use it and like it *please* **consider making a donation to support my AppleScripting efforts. Click here for more info.**

Installation:

To manually install: Put AppleScripts in your iTunes Scripts folder. This is located in *[user name] > Library > iTunes*.

As of OS X 10.7 (Lion), the user Library directory is hidden by default. Option-click the Finder's "Go" menu and select "Library" to make it visible.

If there is no folder named "Scripts" there, create one and put the script(s) in it. AppleScripts will then appear in iTunes' Script menu, and can be activated by selecting by name and clicking. Be sure to also save this Read Me document in a safe and convenient place.

How to use:

Select one or more tracks whose Long Description tags you wish to edit. Enter some text in the dialog box that appears and press OK.

If only one track is selected, its Long Description tag will be displayed as the default text.
