

# iTunes Music Store Player

v1.0

AppleScript for iTunes

written by Phillip Ringli

Find more **free** AppleScripts  
and info on writing your own  
at Doug's AppleScripts for iTunes.

This script plays all the tracks listed in the iTunes Store window without having to click on each one manually.

**This script is Donationware. If you use it and like it *please* consider making a donation to support my AppleScripting efforts. [Click here for more info.](#)**

## Installation:

If you installed the files from the downloaded disk image by dragging them to the "Installer", then the AppleScript and this Read Me document have already been installed in your *[user name] > Library > iTunes > Scripts* folder. The script will appear in iTunes' Script menu, where you can activate it by clicking on its name.

**To manually install, if necessary:** Put AppleScripts in your iTunes Scripts folder. This is located in *[user name] > Library > iTunes*. If there is no folder named "Scripts" there, create one and put the script(s) in it. AppleScripts will then appear in iTunes' Script menu, and can be activated by selecting by name and clicking. Be sure to also save this Read Me document in a safe and convenient place.

## How to use:

Go to the iTunes Store and do a search, for example, of "jazz". It will spit out a list of some 250 songs. Run the script. It will automatically play them all. If you like a song that is playing you switch to itunes and buy it... ;-)
