

# Guitar Tab Search

## v2.1

For macOS 11+/Music v1.1+  
Find more free AppleScripts  
and info on writing your own  
at [dougscripts.com](http://dougscripts.com).

This script performs a search for guitar tabs on the UltimateGuitar.com website using the Song Name or Artist of the playing or selected track. Results are displayed in your default web browser.

For macOS 11 and later only.

This script is Donationware. If you use it and like it please consider making a donation to support my AppleScripting efforts. [Click here for more info.](#)

## Installation:

To make an AppleScript available in **the Music app's** Script menu, install it in the Music "Scripts" folder. This is located at `[user name] / Library / Music / Scripts /`. **Music** will look for AppleScripts in this folder.

*The user Library directory may be hidden by default. To make it visible, hold down the Option key on your keyboard and select **Go > Library** from the Finder.*

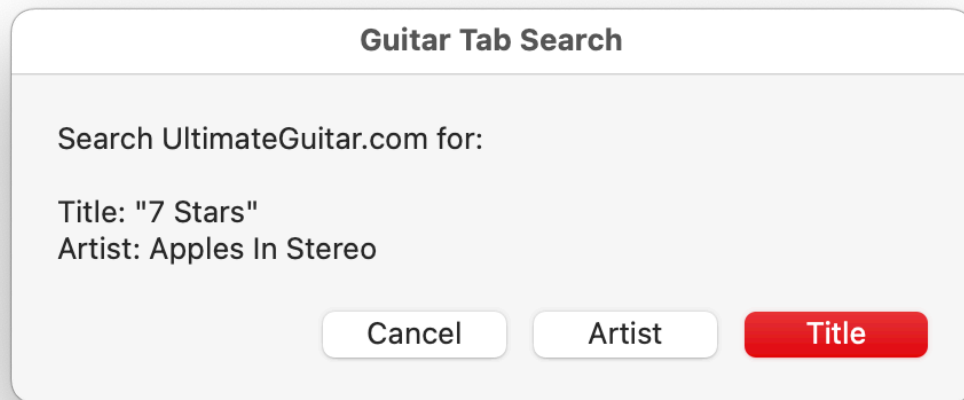

If the `[user name] / Library /` folder does not contain the "Music" folder or "Scripts" folder, then create them and put the script in the "Scripts" folder. AppleScripts will then appear in the Music app's Script menu and can be activated by selecting by name and clicking.

Be sure to also save this Read Me document in a safe and convenient place.

See the **online Download FAQ for more info and video on downloading and installing AppleScripts.**

## How to use:

While a track is playing or selected, launch the script.

The Song Name and the Artist of the track will be displayed. Click the appropriate button to initiate a search of UltimateGuitar.com.
