

New Shuffled Playlist

v2.1

For macOS 11+/Music v1.1+
Find more free AppleScripts
and info on writing your own
at dougscripts.com.

This script will create a copy of the selected playlist or folder playlist with its tracks' play order shuffled--
unlike Music's Shuffle modes which do not display the shuffled order of tracks.

For macOS 11 and later only.

Installation:

To make an AppleScript available in your **Music** Script menu, install it in the Music "Scripts" folder. This is located at *[user name] / Library / Music / Scripts /*. **Music** will look for AppleScripts in this folder.

*The user Library directory may be hidden by default. To make it visible, hold down the Option key on your keyboard and select **Go > Library** from the Finder.*

If the *[user name] / Library /* folder does not contain the "Music" folder or "Scripts" folder, then create them and put the script in the "Scripts" folder. AppleScripts will then appear in the Music app's Script menu, and can be activated by selecting by name and clicking. Be sure to also save this Read Me document in a safe and convenient place.

See the online Download FAQ for more info and video on downloading and installing AppleScripts.

How to use:

Select a user-created **playlist** or **folder playlist** and launch the script. It will create a “regular” playlist copy of the selected playlist with the play order of tracks in a new shuffled order (unlike Music's' Shuffle modes, which do not display the shuffled order of tracks).

- The new playlist's name will be the original playlist's name with “ - Shuffled*” appended to the end.
