

# Playlist to papercdcase.com

## v3.0

For macOS 10.15+/Music v1.0+/Apple TV v1.0+  
Find more free AppleScripts  
and info on writing your own  
at [dougscripts.com](http://dougscripts.com).

This script will send the Artist/Director, Album name, and choosable tag info from the tracks (up to 28 tracks) in the selected Playlist to the website [papercdcase.com](http://papercdcase.com) using Safari.

[papercdcase.com](http://papercdcase.com) is a site that creates a PDF file which can be downloaded, printed, and folded to create a quite serviceable paper CD envelope.

For macOS 10.15 and later only.

This script is Donationware. If you use it and like it please consider making a donation to support my AppleScripting efforts. [Click here for more info.](#)

## Installation:

To make this AppleScript available in your **Music** Script menu, install it in the Music "Scripts" folder. This is located at *[user name] / Library / Music / Scripts /*. **Music** will look for AppleScripts in this folder.

Likewise, the **Apple TV** application will look for AppleScript files in *[user name] / Library / Apple TV / Scripts /* (that's right: "Apple TV"). **\*In order for this script to work with the TV app *at all*, it must be installed in this location.**

*The user Library directory may be hidden by default. To make it visible, hold down the Option key on your keyboard and select **Go > Library** from the Finder.*

If the *[user name] / Library /* folder does not contain the application-appropriate named folder or "Scripts" folder, then create them and put the script(s) in the "Scripts" folder. AppleScripts will then appear in the corresponding app's Script menu, and can be activated by selecting by name and clicking.

Be sure to also save this Read Me document in a safe and convenient place.

**See the online Download FAQ for more info and video on downloading and installing AppleScripts.**

## How to use:

Select a playlist in either the Music app or the TV app\* containing **no more than 28 tracks** and run the script.

- You can select to include the **Track Title, Artist/Director, Composer, Time, Rating,** and/or **BPM** of the tracks in the selected playlist in the string supplied to each track box of the papercdcase.com web form. (They already provide the track number.)

For example, this screen shot of the web form illustrates how I have selected to use the Artist, Track Title, and Time:

<b>Artist</b>	Various Artists	
<b>Title</b>	Poor Little Knitter On the Road - A Tribute to the Knitters	
<b>Tracks</b>		
1	Trailer Bride - Poor Little Critter On the I	15
