

# Search IMDB

## v2.1

For macOS 11+/Music v1.1+/Apple TV v1.1+  
Find more free AppleScripts  
and info on writing your own  
at dougscripts.com.

This script uses information from the single selected track as the basis for a search of the IMDB (Internet Movie Database) website.

For macOS 11 and later only.

This script is Donationware. If you use it and like it please consider making a donation to support my AppleScripting efforts. [Click here for more info.](#)

## Installation:

### For the Music app

To make an AppleScript available in your **Music** Script menu, install it in the Music "Scripts" folder. This is located at *[user name] / Library / Music / Scripts /*. **Music** will look for AppleScripts in this folder.

### For the TV app

Likewise, the **Apple TV** application will look for AppleScript files in *[user name] / Library / Apple TV / Scripts /*. (That's right, "Apple TV".) Indeed, for this script to run at all with the TV app it *must* be installed in this location.

*The user Library directory may be hidden by default. To make it visible, hold down the Option key on your keyboard and select **Go > Library** from the Finder.*

If the *[user name] / Library /* folder does not contain the application-appropriate named folder or "Scripts" folder, then create them and put the script(s) in the "Scripts" folder. AppleScripts will then appear in the corresponding app's Script menu, and can be

activated by selecting by name and clicking.

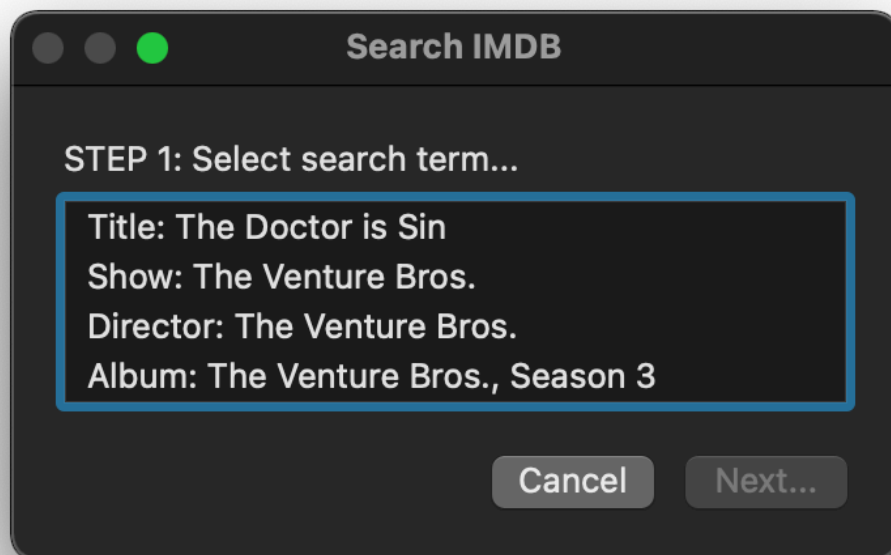

Be sure to also save this Read Me document in a safe and convenient place.

**See the online Download FAQ for more info and video on downloading and installing AppleScripts.**

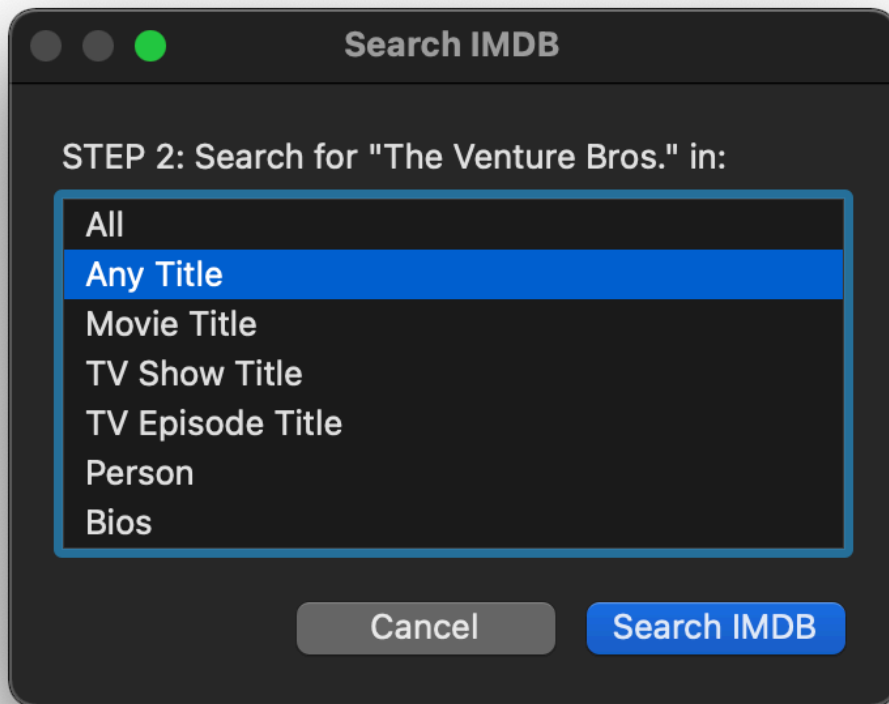

## How to use:

Select a single track and launch the script. Select the **search term** in the first window and click the "Next..." button. In the next window, select the **category** at the IMDB website to search and click the "Search IMDB" button.

Step 1:

Step 2:

In a moment, the results page will be displayed in your default web browser.
