

Swap Title and Artist

v2.0

For macOS 10.15+/Music v1.0+
Find more free AppleScripts
and info on writing your own
at dougscrippts.com.

This script swaps the text in the Title and Artist tags of all--or just the selected--tracks of the selected playlist.

For macOS 10.15 and later only.

This script is Donationware. If you use it and like it please consider making a donation to support my AppleScripting efforts. [Click here for more info.](#)

Installation:

To make an AppleScript available in **the Music app's** Script menu, install it in the Music "Scripts" folder. This is located at *[user name] / Library / Music / Scripts /*. **Music** will look for AppleScripts in this folder.

*The user Library directory may be hidden by default. To make it visible, hold down the Option key on your keyboard and select **Go > Library** from the Finder.*

If the *[user name] / Library /* folder does not contain the "Music" folder or "Scripts" folder, then create them and put the script in the "Scripts" folder. AppleScripts will then appear in the Music app's Script menu and can be activated by selecting by name and clicking.

Be sure to also save this Read Me document in a safe and convenient place.

See the online Download FAQ for more info and video on downloading and installing AppleScripts.

How to use:

Select the tracks you wish to alter—or simply select the playlist that contains such tracks—and launch the script. In a few moments, the text in the Artist and Title tags will be swapped.
