

# This Is The Last Song

## v3.0

For macOS 10.15+/Music v1.0+/Apple TV v1.0+  
Find more free AppleScripts  
and info on writing your own  
at dougscripts.com.

Run this script applet to stop the Music app after the current track finishes playing.

For macOS 10.15 and later only.

## Installation:

This script, "This Is The Last Song", is an **AppleScript applet** and can be run by double-clicking its icon in the Finder. Thus, it can be installed anywhere you find it convenient to access. However, it is probably best accessed from the Script menu of the application you will be using it with, from where it can be launched by clicking its name.

To make an AppleScript available in your **Music** Script menu, install it in the Music "Scripts" folder. This is located at `[user name] / Library / Music / Scripts /`. **Music** will look for AppleScripts in this folder.

*The user Library directory may be hidden by default. To make it visible, hold down the Option key on your keyboard and select **Go > Library** from the Finder.*

If the `[user name] / Library /` folder does not contain the "Music" folder or "Scripts" folder, then create them and put the script in the "Scripts" folder. AppleScripts will then appear in the Music app's Script menu and can be activated by selecting by name and clicking.

Be sure to also save this Read Me document in a safe and convenient place.

**See the online Download FAQ for more info and video on downloading and installing AppleScripts.**

## How to use:

Launch the script while you are listening to a playlist of tracks. When the **current song** finishes playing, the Music app will stop; no other tracks will play.
