

Total Plays

v3.0

For macOS 10.15+/Music v1.0+
Find more free AppleScripts
and info on writing your own
at dougscripts.com.

This script tallies and displays the Plays of each track in a selection of tracks or all tracks in the selected playlist.

For macOS 10.15 and later only.

Installation:

To make an AppleScript available in your **Music** Script menu, install it in the Music "Scripts" folder. This is located at *[user name] / Library / Music / Scripts /*. **Music** will look for AppleScripts in this folder.

*The user Library directory may be hidden by default. To make it visible, hold down the Option key on your keyboard and select **Go > Library** from the Finder.*

If the *[user name] / Library /* folder does not contain the "Music" folder or "Scripts" folder, then create them and put the script in the "Scripts" folder. AppleScripts will then appear in the Music app's Script menu, and can be activated by selecting by name and clicking.

Be sure to also save this Read Me document in a safe and convenient place.

See the online Download FAQ for more info and video on downloading and installing AppleScripts.

How to use:

Select some tracks—or simply select a playlist and all its tracks will be considered selected. Launch the script and in a moment it will report the total play count of the selected tracks/playlist's tracks.
