

Track Titles to Sentence Caps

v2.2

For macOS 11+/Music v1.1+/Apple TV v1.1+
Find more free AppleScripts
and info on writing your own
at dougscripts.com.

Change the case of the selected Music or TV track titles to "sentence case": all lowercase with the initial letter uppercase. For example, "L'effet Que Tu Me Fais" would become "L'effet que tu me fais", and "Comme D'Habitude" becomes "Comme d'habitude". This is customary in many languages.

For macOS 11 and later only.

Installation:

For the Music app

To make an AppleScript available in your **Music** Script menu, install it in the Music "Scripts" folder. This is located at `[user name] / Library / Music / Scripts /`. **Music** will look for AppleScripts in this folder.

For the TV app

Likewise, the **Apple TV** application will look for AppleScript files in `[user name] / Library / Apple TV / Scripts /`. (That's right, "Apple TV".) Indeed, for this script to run at all with the TV app it *must* be installed in this location.

*The user Library directory may be hidden by default. To make it visible, hold down the Option key on your keyboard and select **Go > Library** from the Finder.*

If the `[user name] / Library /` folder does not contain the application-appropriate named

folder or "Scripts" folder, then create them and put the script in the "Scripts" folder. AppleScripts will then appear in the corresponding app's Script menu, and can be activated by selecting by name and clicking. Be sure to also save this Read Me document in a safe and convenient place.

See the online Download FAQ for more info and video on downloading and installing AppleScripts.

How to use:

Select some tracks whose names you wish to change and run the script.
