

New Play Count

v3.0

For iTunes 11+/OS X 10.10+
Find more free AppleScripts
and info on writing your own
at Doug's AppleScripts for iTunes.

Set the Plays of the selected tracks to a user-inputted value (they will all be set to the same value). If this number is 0 then the Last Played date will be erased.

OS X 10.10 and later only.

This script is Donationware. If you use it and like it please consider making a donation to support my AppleScripting efforts. [Click here for more info.](#)

Installation:

Put AppleScripts in your iTunes "Scripts" folder. This is located at *[user name] / Library / iTunes / Scripts /*.

*The user Library directory is hidden by default. To make it visible, hold down the Option key on your keyboard and select **Go > Library** from the Finder.*

If the *[user name] / Library /* folder does not contain the "iTunes" or "Scripts" folders then then create them and put the script(s) in the "Scripts" folder. AppleScripts will then appear in iTunes' Script menu, and can be activated by selecting by name and clicking. Be sure to also save this Read Me document in a safe and convenient place.

See the online [Download FAQ](#) for more info and video on downloading and installing AppleScripts.

How to use:

Select some tracks in iTunes and run the script by selecting its name in the iTunes Script menu. The script will ask you for a number to use as the tracks' new **plays** value. Each selected track will get the same value for a plays value.
