

# Open Selected in QuickTime, Show AV Controls v2.0

## AppleScript for iTunes

Find more **free** AppleScripts  
and info on writing your own  
at Doug's AppleScripts for iTunes.

For Mac OS 10.5 or better.

This script simply opens the single selected audio or video track in iTunes using QuickTime Player 7 and opens the QuickTime A/V Controls window.

**This script is Donationware. If you use it and like it *please* consider making a donation to support my AppleScripting efforts. [Click here for more info.](#)**

### Installation:

**To manually install:** Put AppleScripts in your iTunes Scripts folder. This is located in *[user name] > Library > iTunes*. If there is no folder named "Scripts" there, create one and put the script(s) in it. AppleScripts will then appear in iTunes' Script menu, and can be activated by selecting by name and clicking. Be sure to also save this Read Me document in a safe and convenient place.

### How to use:

Select a single track, audio or video, in iTunes and run the script. The selected track's file will be opened in QuickTime Player 7 and the A/V Controls window will also be activated.
