

Player Position to Start or Stop

v2.0

AppleScript for iTunes

Find more **free** AppleScripts and info on writing your own at Doug's AppleScripts for iTunes.

Sets the Start or Stop time of the currently loaded track to the time of the paused player position.

Use in conjunction with Copy From Start to Stop for a simple file converting/importing/editing set-up.

This script is Donationware. If you use it and like it *please* consider making a donation to support my AppleScripting efforts. [Click here for more info.](#)

Installation:

To manually install: Put AppleScripts in your iTunes "Scripts" folder. This is located in *[user name]* > *Library* > *iTunes*.

(As of OS X 10.7, the user Library directory is hidden by default. Option-click the Finder's "Go" menu and select "Library" to make it visible.)

If there is no folder named "Scripts" there, create one and put the script(s) in it. AppleScripts will then appear in iTunes' Script menu, and can be activated by selecting by name and clicking. Be sure to also save this Read Me document in a safe and convenient place.

How to use:

- Play a track and pause it where you would prefer the track to start.
- Launch the script from iTunes' Scripts Menu and click the "Start time" button.
- Repeat as necessary to set a new Stop time.
- To reset the track's Start and Stop times, uncheck the Start and Stop boxes in the track's Get Info/Option tab.
