Remove All iPod Artwork v1.0

AppleScript for iTunes

Find more **free** AppleScripts
and info on writing your own
at Doug's AppleScripts
http://www.dougscripts.com/itunes/

This script will delete all the artwork from every track in the selected iPod, thus freeing up some space.

This script is Donationware. If you use it and like it *please* consider making a donation to support my AppleScripting efforts. Click here for more info.

How to use:

Put this script in your iTunes Scripts folder. This is located in *user name > Library > iTunes*. If there is no folder named "Scripts" there, create one and put the script in it. It will then appear in iTunes' Script menu, where you can activate it by clicking on its name.

Run the script. If necessary, select the iPod whose tracks you want to delete artwork from.

All artwork from every track on the iPod will be deleted.

When the script is finished, a dialog box will report how much iPod space was recouped after removing artwork.

Although you *could* easily select every track in the iPod library, select Get Info, OK a multiple edit, and check-mark the empty artwork panel, the process of removing artwork in this manner would tie-up iTunes and iPod until the artwork has been removed. This script will work in the background and allow you to continue using iTunes.

v1.0 dec 29 2005
- initial release
