Reset Plays

v1.0

For iTunes 12.4+/OS X 10.8+
Find more free AppleScripts
and info on writing your own
at Doug's AppleScripts for iTunes.

This script will reset the **Plays**, **Last Played**, **Skips**, **Last Skipped**, **Remember Playback Position** and **Played** properties of the selected tracks to default "never played" values.

This script is Donationware. If you use it and like it please consider making a donation to support my AppleScripting efforts. Click here for more info.

Installation:

Put AppleScripts in your iTunes "Scripts" folder. This is located in your *[user name] / Library / iTunes /* folder.

*The user Library directory is hidden by default. To make it visible, hold down the Option key on your keyboard and select **Go > Library** from the Finder.*

If there is no folder named "Scripts" in the *[user name] / Library / iTunes /* folder then create one and put the script(s) in it. AppleScripts will then appear in iTunes' Script menu, and can be activated by selecting by name and clicking. Be sure to also save this Read Me document in a safe and convenient place.

See the online Download FAQ **for more info and video on downloading and installing AppleScripts.**

How to use:

Select some tracks and launch the script by choosing it from the iTunes Script menu. After a few moments (depending on the number of tracks selected), the **Plays**, **Last Played**, **Skips**, **Last Skipped**, **Remember Playback Position** and **Played** properties will be set to default values.
