

Search Amazon Book Covers

v1.3

For iTunes 11+/macOS 10.12+
Find more free AppleScripts
and info on writing your own
at Doug's AppleScripts for iTunes.

This script will use your choice of **Title (Name)**, **Author (Artist)**, **Album**, and/or **Category (Genre)** of a single selected book-type track as the basis for a search of Amazon Books via your default browser. Yer basic.

For macOS 10.12 and later only.

This script is Donationware. If you use it and like it please consider making a donation to support my AppleScripting efforts. [Click here for more info.](#)

Installation:

Put AppleScripts in your iTunes "Scripts" folder. This is located at *[user name] / Library / iTunes / Scripts /*.

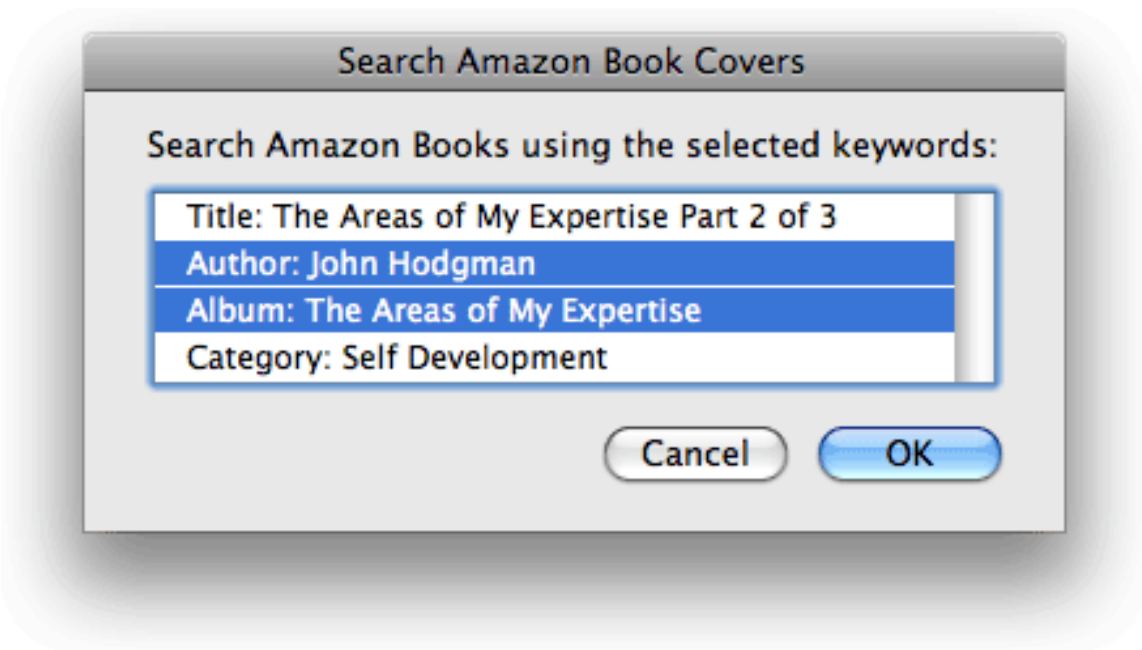

*The user Library directory is hidden by default. To make it visible, hold down the Option key on your keyboard and select **Go > Library** from the Finder.*

If the *[user name] / Library /* folder does not contain the "iTunes" or "Scripts" folders then then create them and put the script(s) in the "Scripts" folder. AppleScripts will then appear in iTunes' Script menu, and can be activated by selecting by name and clicking. Be sure to also save this Read Me document in a safe and convenient place.

See the online Download FAQ for more info and video on downloading and installing AppleScripts.

How to use:

Select a single book-type track in iTunes and run the script. Choose which tags you want to use as keywords:

Fruitful results will be displayed in your **default** browser.

I have found that using "Author" and "Album" (rather than "Title") produces better results. Of course, this will vary based on the information contained in these tags.
