

# Search Amazon UK MP3 v1.0

## AppleScript for iTunes

Find more **free** AppleScripts  
and info on writing your own  
at Doug's AppleScripts for iTunes.

This script will use terms from the single selected track in iTunes as the basis for a search of Amazon MP3, the results of which will be displayed in your default browser.

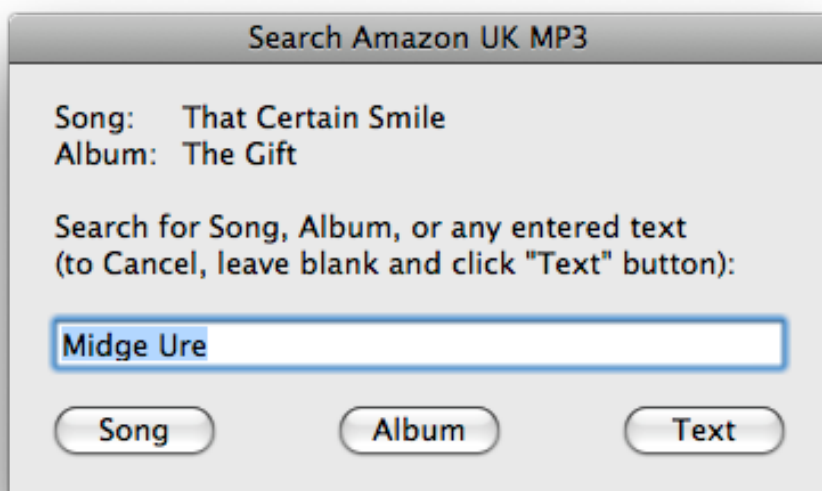

**This script is Donationware. If you use it and like it *please* consider making a donation to support my AppleScripting efforts. [Click here for more info.](#)**

### Installation:

**To manually install:** Put AppleScripts in your iTunes Scripts folder. This is located in *[user name] > Library > iTunes*. If there is no folder named "Scripts" there, create one and put the script(s) in it. AppleScripts will then appear in iTunes' Script menu, and can be activated by selecting by name and clicking. Be sure to also save this Read Me document in a safe and convenient place.

### How to use:

Select a track in iTunes and run the script. This dialog will be displayed:

Amazon MP3 allows three search types: Song, Album, and a sort of general search.

- Click the "Song" or "Album" button to search using the selected track's song name or album name.
- The text entry box is initially set to the selected track's artist name, but you can enter any text. Then click the "Text" button to search using that text.
- To cancel the script, leave the text entry box blank and click the "Text" button.

Results will be displayed in your default web browser.
